
Call for Papers

Probability in the Engineering and Informational Sciences

Special Volume on

Analytic Methods in Health Care and in Clinical Trials

In Honor and Memory of Lycourgos (Lee) Papayanopoulos

The journal of *Probability in the Engineering and Informational Sciences* seeks submissions for a special volume on *Modern Applied Probability Models and Analytic Methods in Health Care and in Clinical Trials* in Honor and Memory of Lycourgos (Lee) Papayanopoulos (May 1, 1939 - March 6, 2015).

The deadline for submission is March 25, 2017.

The main topics of interest are:

Health Management Models

Patient Injury Prevention

Operational Efficiency and Reliability

Performance Monitoring

Clinical Trials

Health Care Supply Chain Coordination and Optimization

This call is open to participants of the Fourth Rutgers Applied Probability Conference, October 2-3, 2015 at Rutgers and by invitation only to other researchers whose work is within the scope of the volume.

Instructions for authors:

Authors should visit the [PEIS journal site](#) for manuscript formatting instructions and examples.

Authors should submit their paper using the [PEIS manuscript central site](#). Be sure to select Special Issue Analytic Methods in Health Care, at the bottom of the main submission page.

Papers will be subject to a strict review process managed by the Guest Editors and accepted papers will be published online individually, before print publication.
